SUMMARY

Computer Science (Data Science) undergraduate with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Machine Learning, and Data Analytics. Experienced in designing end-to-end data engineering pipelines, predictive ML models, asynchronous backend services, and interactive web applications using Python, SQL, Java, PyTorch, Scikit-learn, and FastAPI. Demonstrated capability in solving complex real-world engineering problems with clean architecture, recognized as a Global Hackathon Winner among 650+ teams and top finalist in AI Prompt Engineering competitions. Quick to learn, highly adaptable, and dedicated to building scalable, production-ready AI and software solutions.

TECHNICAL SKILLS

- **Languages & Core CS:** Python, SQL, Java, C, JavaScript (ES6+), TypeScript, Data Structures & Algorithms (DSA), OOP, System Design
- **Machine Learning & AI:** PyTorch, Scikit-learn, Pandas, NumPy, SciPy, OpenCV, Tesseract OCR, NLP, Feature Engineering, Model Evaluation, Prompt Engineering, Generative AI
- **Web & Data Engineering:** FastAPI, Streamlit, Next.js, React, Three.js, RESTful APIs, Asynchronous Processing, Data Pipelines, Parallel API Streaming, HTML5, CSS3
- **Databases & Tools:** PostgreSQL, SQLite, MongoDB, SHA-256 Cryptography, Git, Docker, Postman, Linux/Bash, Vercel

EDUCATION

Rajeev Gandhi Memorial College of Engineering & Technology

Nandyal, India

Bachelor of Technology in Computer Science (Data Science)

2023 – 2027

• CGPA: **7.92 / 10**

• **Relevant Coursework:** Machine Learning, Data Science, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

PROJECTS

AdaptiveAI – Enterprise Operational Intelligence Platform

[GitHub](#) | [Live Demo](#)

Technologies: Python, FastAPI, Next.js, React, Three.js, REST APIs, Data Pipeline Design, Git

- Developed scalable asynchronous backend services using FastAPI to process and serve real-time operational telemetry streams, reducing API response latency by 30%.
- Built interactive frontend dashboards utilizing React and Three.js for real-time visualization of complex multi-dimensional data metrics.

LexHelix – Legal Document NLP & OCR Pipeline

[GitHub](#) | [Live Demo](#)

Technologies: Python, Tesseract OCR, NLP, SQL, SQLite, Streamlit, Git

- Implemented an end-to-end NLP and OCR document processing pipeline using Tesseract OCR to convert unstructured legal courtroom briefs into structured text data.
- Designed an automated text classification engine and SQLite database architecture for real-time compliance scoring and audit logging.

Synapse3D – Multi-Model AI Dashboard

[GitHub](#) | [Live Demo](#)

Technologies: JavaScript, React, RESTful APIs, Data Streaming, Agile Methodologies, Git

- Engineered a responsive multi-model AI streaming dashboard integrating 50+ RESTful APIs with side-by-side parallel output streaming.
- Optimized frontend data rendering performance and managed version control workflows using Git with modular code organization.

ACHIEVEMENTS

• **Global Hackathon Winner – 1st Place (Dreamflow Buildathon 2025 by Hack2Skill)**

| [Blog Link](#)

- Won **1st Place** among 650+ global teams by developing *TenantVerify*, an automated background record verification platform utilizing SHA-256 cryptographic proofs.

• **5th Place – Prompt Wars (RGM CET AI & Prompt Engineering Competition)**

- Secured **5th Place** among top participants by optimizing system prompts, contextual LLM steering, and Generative AI task workflows under competitive time constraints.

CERTIFICATIONS

- **MongoDB Associate Developer** – MongoDB ([Credly](#))
- **Data Analytics Job Simulation** – Deloitte Australia ([Forage](#))
- **Generative AI in Action** – IBM ([Credly](#))
- **AI Fluency for Students** – Anthropic ([Skilljar](#))
- **Gemini Certified University Student** – Google ([Accredible](#))
